

ANKIT GHOSH

ankitghoshhello@gmail.com | 6294230462 | 2027

B.Tech, Artificial Intelligence

Address : mullai boys hostel, potheri, tamil nadu, chennai

Education

SRM IST-Kattankulathur B.Tech · Artificial Intelligence	2027 CGPA - 8.28/10
---	------------------------

Experience

Sasken Technologies Link Intern · Software Developer · Full-Time	Dec 2025 - Present Sector V, Bidhannagar, Kolkata
- Built conversational learning framework with multilingual NLP pipeline: speaker-independent recognition, sentence normalization, intent extraction, real-time knowledge validation. - Integrated cloud LLM inference with on-device memory optimization for real-time human-robot interaction latency and context-awareness.	
PRS Neurosciences https://prsneurosciences.com/ ML Intern · Intern · Full-Time	Jun 2025 - Present Virtual
- Built automated image-preprocessing pipeline with pose-based subject isolation, background reduction, Guetzli/MozJPEG compression optimizing storage/throughput for model-ready datasets. - Designed a modular, scalable batch-processing workflow to improve downstream CV pipeline efficiency.	

Projects

CIRCLE https://github.com/ankitghoshthecreator/CIRCLE Individual	Jan 2026 - Present
- A 5-stage curriculum LLM training with closed-loop RLAI, PyTorch + QLoRA, Groq 70B critic agent, automated evaluation, knowledge distillation. - Designed self-improving architecture with replay buffers, checkpointing, failure diagnosis preventing catastrophic forgetting across curriculum stages. - Engineered containerized, fault-tolerant MLOps (Docker, Kubernetes microservices) with automatic recovery and restart-safety.	
RepoGuard AI: Agentic Code Review Platform https://tinyurl.com/RepoGal Individual project · Python · LLM Agents · Docker · CI/CD	Dec 2025 - Feb 2026 Agentic AI
- Built RepoGuard AI: agentic LLM code review platform auto-generating unit tests and PR summaries for CI/CD workflows. - Implemented retrieval-based static analysis with code structure validation and LLM-driven review to reduce false positives. - Containerized with Docker for reproducible, high-performance agentic automation across CI/CD environments.	
SageRAG — Enterprise Knowledge Assistant https://tinyurl.com/SageRagAi Individual · Python, FastAPI, React, TypeScript, PostgreSQL, Redis, Qdrant, Docker	May 2026 - Sep 2026 Machine learning, SDE
- Built SageRAG: Hybrid RAG with cross-encoder reranking, fine-tuned LLM (LoRA/QLoRA), and source citations grounding responses in enterprise docs. - Engineered ingestion pipeline with dense embeddings (BGE) in Qdrant powering multi-turn streaming chat. - Deployed full-stack (FastAPI + React) with JWT auth, PostgreSQL, Redis, and RAGAS + Langfuse monitoring.	

Competitions

Nitro Stack Hackathon https://tinyurl.com/nitrocertificate 1st Runner Up · NitroStack	Aug 2026
Built multi-agent MCP server: inventory risk assessment, supplier tracking, PO generation, anomaly detection, predictive maintenance with unified ERP/MES/IoT integration and Next.js UI in Claude Desktop.	

Skills

Programming Languages: Python, Java, C/C++, Unity C#
Tools and Technologies: Docker, OpenCV, Transformers, pytorch, Mediapipe, Streamlit, TypeScript, MCP
Domain Knowledge: Natural Language Processing, Speaker Identification
